## Summary

I'm a Computer Science student specializing in Data Science, with a strong interest in data analytics, machine learning, and solving real-world problems using data. I enjoy working with data, finding patterns, and turning raw information into useful insights. One of my projects is a Crop Production Dashboard, where I worked on analyzing and visualizing agricultural data to understand production trends and patterns. Skills: Python | SQL | Data Analytics | Machine Learning | Pandas | NumPy | Power BI | Data Visualization | Excel | Statistics | Git & GitHub I'm currently focused on improving my technical skills, building more real-world projects, and learning new technologies in Data Science and AI. I'm always open to connecting with students, professionals, mentors, and recruiters. Feel free to connect with me and let's learn and grow together.
